Inkora Website Publishing Guide (GitHub Pages)

Step 1: Create GitHub Account

Go to https://github.com/join and register using your email, username, and password.

Step 2: Create New Repository

Click on 'New repository', name it 'inkora', make it Public, then click 'Create repository'.

Step 3: Upload Website Files

Extract Inkora.zip. In the repository, click 'Add file' > 'Upload files', then drag and drop all contents and commit.

Step 4: Enable GitHub Pages

Go to Settings > Pages. Choose branch 'main' and folder '/' then click Save.

Your site will be live at:

https://yourname.github.io/inkora
